At Trivium we are experts at creating original educational content from multiple sources, generating bespoke assessment, testing and grading services around the content we create. Our extensive subject matter expertise extends to providing on-line tutors supporting students from both the educational and professional learning sectors and serving some of the biggest names in education publication and facilitation.

Using our own highly qualified resource and globally recognised methodology we can provide interim and long-term production outsourcing solutions for an extensive range of publication and content processes.

Core services:

Document Data Entry, bulk digitisation and migration from legacy platforms to any CMS/LMS

Accessibility, Alt Text indexing, pdf metadata tagging, digital repository building, language translation

Content creation, instructional design, 3D arts animation, audio and video transcription

Assessment writing, scoring and grading

We provide flexibility and can demonstrate unlimited scale:

200+ text book titles curated

1000+ questions generated per title

250k student essays graded

10m questions answered

6000+ documents digitized
